Exclusivity à la carte

Our goal is to offer an ample range of possibilities to decorate your celebration. Whether it's an intimate ceremony or a grand reception, a formal occasion or a romantic escape, every one of the spaces will be conceived to ensure no guest is left indifferent.

Aire de Fiesta offers four decoration levels – Gold, Platinum, Ruby and Diamond – in which distinction and taste are paramount. The result achieved through each level will always be spectacular, and deeply attractive, but superior levels will include more complexity in the design and greater visual impact

and personalization, as well as a higher number of decorative elements.

Our levels are not defined by specific decoration styles, but by the complexity of the execution. Regardless of the style of your dream wedding – classic, elegant, traditional, vintage, modern – it can be designed through any of the four levels offered.

From a traditional decoration to the most contemporary design, our team will lift all barriers of the imagination and turn your wedding celebration into memories to last a lifetime.

DECORATION BUDGET = DECORATION LEVEL + FLOWER ARRANGEMENT + SUPPLEMENT

We catalog as decoration level the final visual result that is expected from the decoration, which is why the price of each of the levels we offer (Gold, Platinum, Ruby and Diamond), is proportional to the degree of personalization and attention to detail.

Each one of our levels will include the necessary elements to execute our team's decoration proposal, from the ceremony to the cocktail area, wedding dinner or after party, including lighting. The type, quantity and personalization of these elements will be in correspondence with the selected level and with the style of the celebration. The greater the level selected, the greater the amount of detail included in the original quote.

The cost will also include the previous work of planning and logistics- from months before the celebration-, involving our professional expertise and many working hours to achieve results that meet and exceed your expectations.

Flowers are an essential element in the wedding decoration. Unless the design proposal emphasizes other elements, we recommend a budget for flowers in each decoration level. Superior decoration levels also imply greater complexity of flower arrangements.

Flower arrangement proposals will be based on your preferences regarding type or color of the flowers, the number of spaces in need of decoration, the number of guests and the general wedding style. This part of the budget will be shaped by your priorities with regards to the presence of flowers in the ceremony or reception, and the locations of each. The quote will include complements (foliage, floral foam) to be incorporated into the arrangements, as well as the labor of the florists during the day of the wedding.

The supplements are costs that would apply if your wedding is included in any of these scenarios: the type of venue requires extra lighting; the location of the wedding is outside Havana or it takes place in two different locations, if the number of guests exceeds 100, the base value for which all initial service costs have been calculated; if the date chosen has been previously reserved in our event calendar or the reception is extended past midnight. level

gold level

This level has been conceived for couples who wish an attractive yet simple decoration, and may be executed in all decoration styles. In this example, the color palette included white, sand and pastel tones, in harmony with the characteristics of the location and the rustic style of the wedding.

The floral design privileged the use of less classical flowers in the ceremony arrangements. White fabrics, rustic watering cans and tree trunks were perfectly integrated into the style and beautifully transformed every space of this unique garden wedding.

platinum

level

The Platinum level has been conceived for couples who wish more personalized settings, and may also be adapted to all spaces and styles. In this example, the key in the decoration proposal has been elegance. Spaces were designed following a gold and white palette, and high flower arrangements accompanied by candles were emphasized. The decor of the church ceremony was adapted to the solemnity of the space, while the garden dinner privileged the warmth through a wide range of details: glass pendants with candles, light bulb strings and an exquisite matching flower arrangement on the tables

ruby level

The Ruby level has been conceived for those couples who wish a high level of personalization and original elements, for a more affordable cost than the highest, Diamond decoration level. This level includes a great number of possibilities. In this example, the beach and its blue and green tones were protagonist. The ceremony had a high level of complexity given the volume of flower arrangements, while the reception space was transformed to recreate the elegance and lightness of the sea, the axis of the integral decoration concept. The work with fabrics and pendants hanging from the ceiling, the illuminated tables and the flower arrangements of varying heights distinguished this proposal, which enjoyed a great level of personalization in every space.

level

Our greatest decoration level, which boasts an extremely high degree of personalization, attention to detail and original design, is not exclusive to the classic or elegant styles, since it may be adapted to industrial looks, garden weddings, and rustic or vintage spaces.

In this example, glamour and exclusivity guided the concept. An elaborate design for the petal walkaway, pedestals with mirrors to reflect the natural light and a majestic gazebo, recreated a feeling of maximum elegance, as desired by the couple. For the dinner, the ceiling was wholly covered by fabric, fairy lights and original lamps which were produced especially for this celebration. Tables with mirrored surfaces were distributed throughout the room, adding charm and sophistication to the space. Each and every detail, from the flower arrangements to the design of the wedding menus, contributed to give special accents to the décor, offering an exclusive ambiance for the couple.

You may have to budget additional costs in any of the following scenarios:

These supplements might be added to your quote if any of these scenarios apply to your wedding. We will always be mindful of the magnitude of the celebration, the chosen decoration level and the volume of services hired before we apply any of these supplements.

1 The wedding venue requires additional lighting using wireless LED technology. This supplement does not apply for the Ruby and Diamond levels.

2 The location of the wedding is outside Havana

3 The wedding takes place in two different locations (example: the ceremony takes place in a church, and the reception in a hotel).

4 The reception is extended past midnight.

5 You wish to hire the services of Aire de Fiesta for the design and production of invitations, standard guest book and/or fingerprint guest book, or other stationery items not included in your decoration level price).

6 The date chosen has been previously reserved in our event calendar, given the resulting increase in our operation costs. Our recommendation is that once you decide to hire the services of Aire de Fiesta, submit the deposit payment immediately in order to reserve the date.

7 The number of guests exceeds 100, the base value for which all initial service costs have been calculated.
